

# Financial Audit of GMO Money blocking a GMO Labeling Bill

## Politicians allow experimental GMO field trials near our homes, schools & oceans

### Our Politicians have turned our 'Aina into a Chemical Wasteland

The final deadline to hear a GMO labeling bill is gone, and the Chairpersons of both Senate and House Agriculture, Health, and Economic Development/Consumer Protection Committees refuse to hold a hearing.

In November we will vote these corrupt Committee Chairpersons out that blocked a GMO labeling bill this year:  
**Senate: Clarence Nishihara, Rosalyn Baker House: Cliff Tsuji, Calvin Say, Ryan Yamane, Bob Herkes**

**Genetically Modified Legislators: Monsanto and GMO Money in Hawaii** (parentheses denotes associations)

**Monsanto** has 6 registered lobbyists: John H. Radcliffe (who represents 19 clients), George "Red" Morris, Dawn Bicoy, Paul Koehler, Alan Takemoto, Fred Perlak, and Alicia Maluafiti. Radcliffe and Morris have an iron grip on our politicians. Maluafiti is the Executive Director of Hawaii Crop Improvement Association, 'The Lobbyist' for the 5 biotech companies in Hawaii- Monsanto, Syngenta, Pioneer (DuPont), Bayer, and BASF. Radcliffe, Morris, and Maluafiti have personally donated thousands of dollars to the lawmakers, and Monsanto has given \$250-\$1000 per legislator or councilmember. Robert S. Toyofuku and Derek Naten represent Bayer, Scott Matsuura (A&B) and James Pacopac work for Syngenta.

**Next steps:**

1. Pass a county ordinance to label genetically modified foods grown, manufactured, and sold in Hawaii. Maui, Kauai and Hawaii counties have already passed resolutions to label GMO. The next step is to pass a local ordinance.
2. The City Council will be losing Nestor Garcia and Romy Cachola, It is time to vote in pro GMO labeling supporters. Kimberly Pine will be running for Tom Berg's seat. Alex Santiago will run for City Council. Ben Cayetano brought GMO to Hawaii. None are to be trusted! Support the lesser known candidate and educate him/her about GMO, Monsanto, and the importance of labeling to make it part of the campaign.
3. Encourage farmers and food producers to independently label their foods non GMO.
4. Vote with your dollars! Do not buy Hawaiian papaya and products containing unlabeled soy, corn, canola, cottonseed.
5. We must educate everyone that Hawai'i is the experimental GMO field trial lab of the world.
6. Support local farmers growing organic and non GMO. Buy at farmers markets. Grow a garden in your backyard. Encourage neighbors to grow food in gardens and rooftop gardening, see Foodscapes. Support school gardens not funded by GMO companies. Encourage healthy fresh food in the schools. Attend town hall meetings and expose lawmakers' lies.

**The only way to pass a GMO labeling bill is if we vote these corrupt lawmakers OUT in NOVEMBER 2012.**
